Vision

Nova Scotia’s public sector is open and accountable. Privacy rights of citizens are respected and protected.
October 26, 2022

Speaker of the House of Assembly  
1st Floor, Province House  
PO Box 1617  
Halifax, Nova Scotia B3J 2Y3

Dear Speaker of the House,

Pursuant to s. 33(7) of the Freedom of Information and Protection of Privacy Act, s. 4(3) of the Privacy Review Officer Act and s. 93(b) of the Personal Health Information Act, I submit this annual report for the 12 month period of April 1, 2021 through to March 31, 2022.

Respectfully submitted,

[Signature]

Tricia Ralph  
Information and Privacy Commissioner for Nova Scotia

Commissioner’s Message

Nova Scotia was once a proud leader in the access to information realm as the first in Canada to enact a Freedom of Information Act in 1977. Unfortunately, despite replacing that Act with the existing Freedom of Information and Protection of Privacy Act (FOIPOP) in 1993, Nova Scotia is no longer a leader. Instead, because Nova Scotia has not significantly updated its FOIPOP legislation in 29 years, the laws are outdated and not up to the task of protecting Nova Scotian’s access and privacy rights.

Modernizing Nova Scotia’s Access & Privacy Laws - The Time for Change is Now
In September 2021, the Nova Scotia Government gave the Minister of Justice a mandate to amend the Freedom of Information and Protection of Privacy Act.¹ I believe that a comprehensive review of Nova Scotia’s access and privacy laws must be undertaken, and the entire legislative scheme overhauled, to bring it in line with modern access and privacy best practices. Thankfully, there are many examples of statutory language from other jurisdictions that can be used as models for modernizing Nova Scotia’s access and privacy legislation. Many jurisdictions have had updated legislation in place for years. There is no need to reinvent the wheel – Nova Scotia can look to other jurisdictions to speed along this process.

On top of that, in 2017, former Commissioner Catherine Tully published a report titled Accountability for the Digital Age - Modernizing Nova Scotia’s Access & Privacy Laws (2017 Special Report). In it, she reviewed the adequacy of Nova Scotia’s access to information and privacy laws and provided 34 recommendations for modernizing the legislative scheme. I had intended to publish an updated version of the 2017 Special Report as a stand-alone document along with this annual report, but frankly, much of the report would have been identical to the 2017 Special Report. This is because the same changes that were needed in 2017 are still needed in 2022. I decided to change course and set out the 34 recommendations from the 2017 Special Report in this annual report instead. I have updated the 2017 recommendations to reflect additional best practices that have evolved since that time.

Recommendations for Legislative Change
There are four core areas of weakness in Nova Scotia’s access to information and privacy laws. There are 34 recommendations to fix these weaknesses. They fall into four broad categories:

1. Organization and Coverage
2. Modernizing Access Rights
3. Modernizing Privacy Rights
4. Improving Oversight

¹ Tim Houston, Department of Justice Mandate Letter (September 2021), online: <https://novascotia.ca/exec_council/letters-2021/ministerial-mandate-letter-2021-AG-DOJ.pdf>.
Commissioner’s Message

1. Organization and Coverage
Nova Scotia has a puzzling array of five access to information and privacy laws.\(^2\) As a result, access to information and privacy protections differ depending on what level of government or what organization holds the information. This is confusing for the public. One example is that the Information and Privacy Commissioner (IPC) has oversight over the privacy practices of provincial public bodies under FOIPOP, but not municipalities under Part XX of the Municipal Government Act. The public deserves the same level of protection, regardless of what level of government holds the information. Another example is the various other pieces of legislation that chip away at Nova Scotians’ access to information and privacy rights through the creation of notwithstanding clauses.

2. Modernizing Access Rights
There are many ways that access to information rights in Nova Scotia can be improved, such as strengthening the weak public interest override provision, creating a duty to document, giving the IPC the ability to disregard frivolous or vexatious requests and implementing time limits where they are missing from the legislation.

3. Modernizing Privacy Rights
Nova Scotia’s privacy laws contain flaws and loopholes and lack almost all the essential modern privacy protections found in other Canadian jurisdictions. At a time when public bodies and municipalities are collecting more personal information than ever, the laws have not kept up to ensure protection of that information. Nova Scotia’s laws need foundational privacy protections such as requirements for mandatory privacy impact assessments, mandatory privacy breach notifications, privacy management programs and collection of personal information notification.

4. Improving Oversight
An independent review process and the IPC position are critical to the success of the access to information and privacy regime. The problem is that Nova Scotia’s laws are missing several core elements of independence. Many people would be surprised to learn that Nova Scotia is the only jurisdiction in Canada where the IPC is not an independent officer of the House of Assembly. And, because Nova Scotia uses the recommendation-making model, public bodies and municipalities can choose to ignore the IPC’s recommendations.

I believe that a comprehensive review of Nova Scotia’s access and privacy laws must be undertaken, and the entire legislative scheme overhauled, to bring it in line with modern access and privacy best practices.

Conclusion
Access to information and privacy rights are fundamental to the functioning of an effective democracy. I am hopeful that the recommendations put forth by my predecessor and I will be accepted and implemented sooner rather than later. The time for change is now.

I conclude by thanking my staff for their dedication to improving the access to information and privacy rights of Nova Scotians. Despite being understaffed, we will continue working towards reducing our backlog and striving for the implementation of meaningful access to information and privacy laws in this province.

Yours sincerely,

Tricia Ralph
Information and Privacy Commissioner for Nova Scotia

\(^2\) These laws are the Freedom of Information and Protection of Privacy Act, Part XX of the Municipal Government Act, the Privacy Review Officer Act and the Personal Health Information Act. In addition, there is also the Personal Information International Disclosure Protection Act.
Access to information and privacy rights are critical components of a healthy democracy. These rights support citizens’ ability to participate in public life and to hold public bodies and municipalities fully accountable. Privacy rights have been recognized as being quasi-constitutional in Canada.

The current *Freedom of Information and Protection of Privacy Act (FOIPOP)* came into effect almost 30 years ago. Very little has changed in those 30 years with only one statutory review in October 2003. Nova Scotia was once a leader. Now its laws fall short of the rigorous and substantive protections we see in other jurisdictions across the country.

In 2021, the Government of Nova Scotia included in its mandate letter to the Minister of Justice a direction to amend *FOIPOP* to give order-making power to the Information and Privacy Commissioner. While order-making power is welcome, the entire regime is now so outdated that it needs a fulsome overhaul to properly support such a power if it is granted, and to make other necessary updates.

The 34 recommendations that follow build upon former Commissioner Tully’s 2017 report: *Accountability for the Digital Age - Modernizing Nova Scotia’s Access & Privacy Laws* (2017 Special Report). I had at first intended to issue a stand-alone update to the 2017 Special Report. However, it became apparent that a new report was not needed, as the recommendations made in 2017 are still needed today in 2022. Where necessary, I have updated the 2017 recommendations in the pages that follow. Otherwise, the recommendations set out below are the same as those made five years ago.

These recommendations are intended to serve as a road map to improve access to information and privacy legislation in this province. They can be used as a guide for the Government of Nova Scotia and the Nova Scotia Legislature in taking steps forward to modernize Nova Scotia’s laws. They are also intended to raise public awareness so that citizens understand where Nova Scotia’s access to information and privacy laws are lacking and can hold their government to account for updating the laws to provide them with the rights they deserve. The time for change is now.

The recommendations are focused on curing Nova Scotia’s trailing public sector access and privacy laws: *Freedom of Information and Protection of Privacy Act*, *Part XX* of the *Municipal Government Act* and *Privacy Review Officer Act*. They fall into four broad categories:

1. Organization and Coverage
2. Modernizing Access Rights
3. Modernizing Privacy Rights
4. Improving Oversight

---

4 Tim Houston, Department of Justice Mandate Letter (September 2021), online: <https://novascotia.ca/exec_council/letters-2021/ministerial-mandate-letter-2021-AG-DOJ.pdf>.
## Summary of Recommendations to Modernize Nova Scotia’s Access & Privacy Laws

### Recommendation #1: Organization of the Acts

**2017 Special Report**

Combine the access and privacy rules contained in the *Freedom of Information and Protection of Privacy Act (FOIPOP)*, *Municipal Government Act Part XX (MGA)*, *Personal Information International Disclosure Protection Act (PIIDPA)*, and *Privacy Review Officer Act (PRO)* into one complete *Freedom of Information and Protection of Privacy Act*.

**2022 Update:**

While the 2017 Special Report spoke to the issue of the lack of privacy oversight rules applying to municipalities, this issue was not addressed specifically in a recommendation.

As such, Recommendation #1 is updated as follows:

a) Combine the access and privacy rules contained in the *Freedom of Information and Protection of Privacy Act (FOIPOP)*, *Municipal Government Act Part XX (MGA)*, *Personal Information International Disclosure Protection Act (PIIDPA)*, and *Privacy Review Officer Act (PRO)* into one complete *Freedom of Information and Protection of Privacy Act*.

b) Establish the Commissioner as responsible for independent privacy oversight for municipalities (the OIPC will require additional resourcing to implement this recommendation).

### Recommendation #2: Extending coverage

**2017 Special Report**

a) Create a clear, criteria-based definition of public body.

b) Make MLA offices and officers of the legislature subject to the privacy rules set out in *FOIPOP*.

**2022 Update:**

It is not only MLA offices and officers of the House of Assembly that should be subject to the privacy rules in *FOIPOP*. Currently *FOIPOP* also sets out a Schedule that lists a variety of other bodies that meet the definition of “public body”. This schedule to *FOIPOP* has not been updated in many years and causes confusion where some professional regulatory boards are included, for example the Board of Embalmers and Funeral Directors and the Denturist Licensing Board of Nova Scotia, but other similar professional regulatory bodies are not, such as the Provincial Dental Board of Nova Scotia.

Professional colleges and regulatory bodies carry out functions pursuant to statutes in the public interest and they collect and use sensitive personal information in the course of their work. Many currently do not have to follow any privacy rules at all. There is no public policy reason why all professional colleges and regulatory bodies should not be subject to privacy protection rules and independent oversight of their compliance with such rules.

As such, Recommendation #2 is updated as follows:

a) Create a clear, criteria-based definition of public body.

b) Make all organizations and entities in Nova Scotia who are operating in the public interest and/or are publicly funded, who collect and handle personal information and who currently are not covered by any privacy laws, such as officers of the House of Assembly, Members of the Legislative Assembly offices, and professional regulatory bodies, subject to the privacy rules under the oversight of the Commissioner.

---

**There is no public policy reason why all professional colleges and regulatory bodies should not be subject to privacy protection rules and independent oversight of their compliance with such rules.**
Summary of Recommendations to Modernize
Nova Scotia’s Access & Privacy Laws

Recommendation #3: Conflict with other enactments - 2017 Special Report

As such, Recommendation #3 is updated as follows:

a) Conduct a thorough review of all of the conflict clauses listed in ss. 4A(2) of FOIPOP and 464A(2) of the MGA with a view to reducing the list to only those that are demonstrably necessary. The review should take into consideration the exemptions to disclosure already in existence and should particularly avoid unnecessary exclusions in light of the exemptions.

b) Require periodic statutory reviews of ss. 4A(2) of FOIPOP and 464A(2) of the MGA.

c) Add a provision to specify the criteria for when a notwithstanding clause would be appropriate in FOIPOP and the MGA.

d) Add a provision requiring government to list provisions in statutes that prevail over FOIPOP and the MGA in schedules to the Acts and include a review of these schedules in any regular review of FOIPOP or the MGA.

e) Add a provision that explicitly states that any notwithstanding FOIPOP or MGA clauses do not alter a public body or municipality’s privacy responsibilities under those Acts.

2022 Update:
These blanket exclusions also have the effect of removing the applicability of the privacy obligations under FOIPOP and the MGA and people’s related privacy rights, including in some cases the oversight authority of the Commissioner.

Recommendation #4: Protecting applicant identity - 2017 Special Report

Add a provision to Nova Scotia’s access law requiring that the name of applicants be kept confidential except as specifically enumerated for the purposes of processing an access request or appeal related to that request.

2022 Update:
No change.

Recommendation #5: Fees 2017 Special Report

a) Eliminate the $5 application fee.

b) Allow for a minimum of five hours of search and processing time before any fee is charged.

c) Prohibit charging of fees for time spent severing the record.

d) Impose timelines for decisions relating to fee waiver requests.

e) Add public interest as a ground for fee waivers by municipalities.

f) Require refund of fees when decisions are issued late.

2022 Update:
No change.

**2022 Update:**
No change.

| Recommendation #14: Core privacy standards 2017 Special Report |
| Add three core privacy standards to FOIPOP and the MGA: |
| a) Prohibit collection, use, or disclosure of personal information if other information will serve the purpose. |
| b) Limit collection, use, and disclosure of personal information to the minimum personal information necessary. |
| c) Permit disclosure of personal information within an organization only on a need to know basis. |

**2022 Update:**
No change.
Summary of Recommendations to Modernize Nova Scotia’s Access & Privacy Laws

Modernizing Privacy Rights

Recommendation #15: Privacy impact assessments - 2017 Special Report

a) Require that public bodies and municipalities complete a privacy impact assessment on all new projects, programs, systems, enactments, and activities.

b) Require that public bodies that are government departments submit their privacy impact assessments to the Minister responsible for the Act for the Minister’s review and comment.

c) Where the proposed program, project, system, or activity involves a common or integrated program or activity, require that the privacy impact assessment be provided to the Commissioner for comment (consistent with recommendation #12(b) above).

d) Where the proposed program, project, system, or activity involves big data, require that a privacy impact assessment be completed and provided to the Commissioner for comment (consistent with recommendation 13(d) above).

2022 Update:
No change.

Recommendation #16: Information sharing agreements - 2017 Special Report

a) Amend FOIPOP and the MGA to require that any regular sharing of personal information by public bodies or municipalities be in writing in the form of information sharing agreements. Include requirements regarding the content of the information sharing agreements.

b) Require public bodies and municipalities to notify the Commissioner of all new or amended agreements to share personal information and give the Commissioner explicit authority to review and comment on the agreements.

c) Require publication of the existence and nature of the information sharing agreements between public bodies, municipalities, and with other external bodies.

2022 Update:
No change.

Recommendation #17: Privacy management program requirements - 2017 Special Report

Add a requirement that public bodies and municipalities have a privacy management program that:

a) Designates one or more individuals to be responsible for ensuring that the public body or municipality complies with FOIPOP and the MGA from within the organization.

b) Is tailored to the structure, scale, volume, and sensitivity of the personal information collected by the public body or municipality.

c) Includes policies and practices that are developed and followed so that the public body or municipality can meet its obligations under FOIPOP or the MGA, and makes policies publicly available.

d) Includes mandatory privacy training for all employees.

e) Has a process to respond to complaints that may arise respecting the application of FOIPOP or the MGA.

2022 Update:
No change.

Recommendation #18: Mandatory privacy breach notification - 2017 Special Report

a) Require notification to affected individuals and the Commissioner, without unreasonable delay, of all privacy breaches involving a real risk of significant harm.

b) Specify content requirements for notification to individuals including: details about the cause of the breach, a list of the type of data lost or stolen, an explanation of the risks of harm affected individuals may experience as a result of the breach, and information about the right to complain to the Commissioner.

c) Authorize the Commissioner to order notification to an individual affected by the breach.

d) Require maintenance of a record of all data breaches with specified details available to the Commissioner upon request.

2022 Update:
No change.
Summary of Recommendations to Modernize Nova Scotia’s Access & Privacy Laws

Modernizing Privacy Rights

Recommendation #19: Mandatory consultation on draft legislation - 2017 Special Report

- Impose a duty on Ministers to consult with the Commissioner on any proposed Bill that could have implications for access to information or protection of privacy prior to introduction into the House.
- Provide the Commissioner with the necessary general power to comment on the implications for access to information or for protection of privacy of proposed legislative schemes.

2022 Update:
No change.

Recommendation #20: Collection notification - 2017 Special Report

- Add a requirement to FOIPOP and the MGA that personal information must be collected directly from the individual the information is about unless the law authorizes another method of collection.
- Where information is collected directly from an individual, require that the public body or municipality tell the individual from whom it collects personal information the purpose for collecting it, the legal authority for collecting it, and the contact information of an individual who can answer any questions.

2022 Update:
No change.

Recommendation #21: Personal information banks - 2017 Special Report

- Repeal s. 48(7) so that the requirement for personal information banks applies to all public bodies and without any further legislative effort (consistent with recommendation 11(c)).
- Require that municipalities publish and maintain personal information banks.

2022 Update:
It is clear in 2022 that public bodies and municipalities must go further than what was contemplated in 2017 in order to implement reasonable safeguards to protect the information they hold within personal information banks. Authorized users of electronic information systems pose a substantial risk to the information held by public bodies and municipalities, such that implementing regularized auditing of user activity within information banks is an important modern safeguard to protect privacy and so that any instances of accessing the information for unauthorized purposes is identified and appropriately responded to as a breach of privacy.

As such, Recommendation #21 is updated as follows:

Amend Nova Scotia’s access to information and privacy laws to:

- Repeal s. 48(7) of FOIPOP so that the requirement for personal information banks applies to all public bodies and without any further legislative effort.
- Introduce statutory provisions to implement the same requirement for personal information banks for municipalities under Part XX of the MGA.
- Require that public bodies and municipalities publish and maintain personal information banks.
- Require that public bodies and municipalities conduct regular monitoring and audits of authorized users’ access to personal information banks.
Recommendation #22: Officer of the legislature - 2017 Special Report
Make the Information and Privacy Commissioner (Review Officer and Privacy Review Officer) an officer of the legislature.

2022 Update:
This recommendation requires an update to reflect the more accurate terminology used by other officers and the Nova Scotia House of Assembly.

As such, Recommendation #22 is updated as follows:

Amend Nova Scotia’s access to information and privacy laws to make the Information and Privacy Commissioner (Review Officer and Privacy Review Officer) an officer of the House of Assembly.

Recommendation #23: Name change
2017 Special Report
Change the name of the oversight body in FOIPOP with necessary consequential amendments to PRO, the Personal Health Information Act (PHIA) and the MGA to “Information and Privacy Commissioner”.

2022 Update:
No change.

Recommendation #24: Employees, experts, and support - 2017 Special Report
a) Authorize the Commissioner to appoint employees she considers necessary in such positions she considers appropriate under such classification ratings and at such rates of remuneration within those classification ratings established by the Public Service Commissioner.

b) Authorize the Commissioner to engage the services of such counsel or other professionals or experts to advise or assist the Commissioner notwithstanding any government procurement rules or policies.

c) Authorize the Commissioner to delegate any of her powers except the power to delegate. Make clear that such delegation may occur when the Commissioner declares a conflict of interest.

2022 Update:
No change.

Recommendation #25: Restrictions on disclosure and immunity - 2017 Special Report
Add a provision enumerating the permitted uses and disclosures of information by the Commissioner and her staff and a provision specifying the immunity of the Commissioner and her staff.

2022 Update:
No change.
Summary of Recommendations to Modernize Nova Scotia’s Access & Privacy Laws

Improving Oversight

Recommendation #26: Authority of the Commissioner - 2017 Special Report
Amend FOIPOP and the MGA to shift the burden onto the public body or municipality to seek a declaration of the Nova Scotia Supreme Court whenever the public body or municipality decides that it will not follow the recommendations of the Commissioner.

2022 Update:
Currently, applicants bear the burden of taking public bodies and municipalities to court if they do not follow the Commissioner’s recommendations. An alternative to the proposed modified recommendation model is to simply provide the Commissioner with order-making power. This was the direction contemplated in the Premier’s 2021 mandate letter to the Minister of Justice.

As such, Recommendation #26 is updated as follows:

Amend Nova Scotia’s access to information and privacy laws to:

a) Shift the burden onto the public body or municipality to seek permission from the Nova Scotia Supreme Court whenever the public body or municipality decides that it will not follow the recommendations of the Commissioner.

b) Alternatively, grant order-making power to the Commissioner (this approach would require significantly more OIPC resources).

Recommendation #27: Power to determine procedure - 2017 Special Report
Amend s. 38 of FOIPOP and s. 491 of the MGA to add general powers of the Commissioner that include the power to determine the procedure to be followed in the exercise of the powers or performance of any duties pursuant to the MGA or FOIPOP.

2022 Update:
No change.

| b) Require any person to produce a record for the Commissioner that is in the person’s custody or control, including personal information.  
| c) Require the Commissioner to return any record or copy of any record produced by the public body concerned.  |  
| **2022 Update:**  
The Commissioner’s powers with respect to the ability to compel witnesses and evidence under oath are absent in Nova Scotia’s laws. Nova Scotia’s legislation does not contain provisions that would allow the Commissioner’s office to compel oral or written evidence on oath or affirmation. This is unlike almost every other Canadian jurisdiction. In practice, this means that the Commissioner must accept the statements made by public bodies, municipalities and applicants as the truth, without any rigor or assurance. Unlike in some other jurisdictions, the current laws in Nova Scotia carry no consequences for lying to or misleading the Commissioner.  
As such, Recommendation #28 is updated as follows:  
| Amend s. 38 of **FOIPOP** and s. 491 of the **MGA** to:  
| a) Make clear that solicitor-client privilege is not affected by disclosure to the Commissioner.  
| b) Require any person to produce a record for the Commissioner that is in the person’s custody or control, including personal information.  
| c) Require a person to answer the Commissioner’s questions on oath or affirmation or give the Commissioner all the powers of a Commissioner under the **Public Inquiries Act**.  
| d) Require the Commissioner to return any record or copy of any record produced by the public body concerned.  |  |  

**Recommendation #29: Information sharing between oversight agencies** - [2017 Special Report](#)  
Amend **FOIPOP** and the **MGA** to allow the Commissioner to exchange information with extra provincial Commissioners for the purpose of coordinating activities and handling reviews and complaints involving two or more jurisdictions.  
**2022 Update:**  
No change.  

**Recommendation #30: Grounds to refuse to proceed with a review** - [2017 Special Report](#)  
| a) Amend **FOIPOP** and the **MGA** to add a provision that states that where the Commissioner is satisfied that there are reasonable grounds to review any matter, the Commissioner shall review the matter. Include grounds where the Commissioner may refuse to conduct a review including where the application is frivolous or vexatious, not made in good faith, concerns a trivial matter, does not contain sufficient evidence, has already been the subject of a report by the Commissioner, the public body has responded adequately to the complaint, the length of time that has elapsed, or for any other reason it is fair and reasonable not to conduct a review.  
| b) Amend s. 39 of **FOIPOP** and s. 492 of the **MGA** to provide that on completing a review the Commissioner “may” prepare a written report rather than “shall” prepare a written report.  |  
| **2022 Update:**  
No change.  |

<tr>
<td><strong>Recommendation #31: Review and complaint time limits - 2017 Special Report</strong> Amend FOIPOP and the MGA to provide that the Commissioner should conclude her investigation and mediation processes and, if necessary, issue a report within 90 days of receipt of a complaint or request for review. Include an option to allow for longer period of time at the Commissioner's discretion and with written notice to the parties.</td>
</tr>
</tbody>
</table>

**2022 Update:**
Having statutory time limits for the Commissioner’s processes makes good sense and provides applicants, public bodies and municipalities with assurance about the timeliness of the administration of justice. However, for Nova Scotia, the underlying issue of insufficient resourcing for the OIPC, which resulted in the current four-year backlog of review files, must be addressed in order to meet any kind of statutory review time deadline. The OIPC would not currently be in a position to fulfill statutory time limits on its processes without being provided with additional resources.

At the time of the 2017 Special Report, investigators were provided with about 60 days to informally resolve the matter or move it forward to a public review report. Since that time, the OIPC has increased that timeframe to 80 days as many public bodies and municipalities requested additional time for this process. There are many occasions when more time can be fruitful in terms of resolving the matter informally, especially if the matter includes third party interests.

As such, Recommendation #31 is updated as follows:

Amend Nova Scotia’s access to information and privacy laws to provide that the Commissioner should conclude the review of a matter and, if necessary, issue a report within 120 days of receipt of a complaint or request for review. Include an option to allow for a longer period of time at the Commissioner’s discretion and with written notice to the parties (the OIPC will require additional resourcing to implement this recommendation).

**Recommendation # 32: General powers of Commissioner - 2017 Special Report** Amend s. 38 of FOIPOP and s. 491 of the MGA to add general powers of the Commissioner that include the following:

a) Monitor how the privacy and access provisions are administered and conduct reviews of access and privacy complaints arising from the access and privacy provisions.

b) Initiate investigations of access and privacy compliance including matters or allegations of unauthorized destruction of records.

c) Make recommendations on and mediate access and privacy complaints.

d) Undertake research matters concerning privacy and access legislation.

e) Inform the public about the Acts.

f) Conduct audits.

g) Authorize public bodies and municipalities to disregard requests.

h) Determine OIPC procedures.

i) Comment on the implications for access to information or for protection of privacy of any matter including proposed projects, activities, systems, information sharing agreements and legislative schemes of public bodies and municipal bodies.

**2022 Update:**
No change.
Summary of Recommendations to Modernize
Nova Scotia’s Access & Privacy Laws

Improving Oversight

Recommendation #33: Update offence provisions - 2017 Special Report

Update Nova Scotia’s offence provisions by:

a) Making the following offences under the law:
   - obstructing the Commissioner;
   - misleading the Commissioner and knowingly making a false statement to the Commissioner;
   - obstructing the right of access by destroying, altering, falsifying, or concealing a record with intent to evade a request for access;
   - directing another to destroy, alter, falsify, or conceal any record; and
   - willfully or knowingly collecting, using, or disclosing personal information in contravention of the law.

b) Set the fine on conviction at a maximum of $20,000 for individuals and higher for organizations and service providers.

2022 Update:

Other statutes in Nova Scotia that contain regulatory offences usually contain clear enforcement mechanisms that designate who is responsible for enforcement actions and investigations. For example, Nova Scotia’s Environment Act and Occupational Health and Safety Act set out who is responsible for enforcement of the regulatory offences provided within them. The offence provisions in Nova Scotia’s access and privacy laws do not set out a mechanism to trigger an investigation or prosecution of the offences. The OIPC has inquired about how offences in Nova Scotia could be brought forward for prosecution. The result of the OIPC’s inquiries is that no one is clearly responsible for the investigation and enforcement of the freedom of information and protection of privacy offences set out in Nova Scotia’s laws. Regulatory offences related to freedom of information and protection of privacy are common across Canada. Those jurisdictions who have successfully prosecuted individuals are those that also contain an explicit power for the Information and Privacy Commissioner’s office to enforce the offence provisions within the legislation.

In addition to the gap in the enforcement mechanism, Nova Scotia’s laws are also silent on the time limit within which a prosecution must be started. Because of the nature of the offences set out in the Acts, the time limits for bringing forward prosecution are set out in the Criminal Code of Canada in conjunction with Nova Scotia’s Summary Proceedings Act. Those rules say that a prosecution must be commenced within twelve months of the commission of the offence.

Twelve months from the date of commission of the offence is not enough time to initiate prosecution of this type of offence. Many times, this type of offence is not discovered until much later. It is very common with regulatory offences for the time limits to be set out in the statute that contains the offences and for the time limit to be two years from the date of discovery of the offence. This is also reflected in Nova Scotia’s Environment Act and Occupational Health and Safety Act. It is more typical of access and privacy legislation, particularly in jurisdictions that have successfully prosecuted these types of offences, to provide the limitation period in the statute that sets out the offences, and to establish a limitation period of two years from the date the offences are discovered.

In addition, Nova Scotia’s offence provisions do not adequately reflect the changing technology and uses of information. For example, identifying or attempting to identify a natural person using de-identified information is now an offence under Quebec’s law. This is a new offence provision that reflects new types of behaviour and risks from the proliferation of personal information and the use of de-identified information in new ways.
Summary of Recommendations to Modernize Nova Scotia’s Access & Privacy Laws

Improving Oversight

As such, Recommendation #33 is updated as follows:

Amend Nova Scotia’s access to information and privacy laws to:

a) Make the following offences:
   • Obstructing the Commissioner or otherwise impeding the progress of an inquiry or investigation of the Commissioner.
   • Misleading the Commissioner or knowingly making a false statement to the Commissioner.
   • Obstructing or impeding the right of access by destroying, altering, falsifying, concealing or delaying the release of a record with intent to evade a request for access.
   • Directing another to destroy, alter, falsify or conceal any record, or unduly delaying the release of a record.
   • Willfully or knowingly collecting, using or disclosing personal information in contravention of the law.
   • Identifying or attempting to identify a natural person using de-identified information without authority.

b) Set the fine on conviction at a maximum of $20,000 for individuals and higher for organizations and service providers.

c) Designate an enforcement body responsible for initiating the investigation of offences and referring matters to Nova Scotia’s Public Prosecution Service and include a provision authorizing the enforcement body’s disclosure of information relating to the commission of an offence. Consider making the OIPC the enforcement body.

d) Remove the “malicious” threshold in the offence provisions.

e) Allow the prosecution of offences to be initiated within two years of discovery of an offence.

Recommendation #34: Review of the Acts

Amend s. 50 of FOIPOP and add provisions to PRO, PIIDPA and the MGA to require that:

a) A review must be conducted of each Act at least every six years.

b) The reviews must be conducted by an independent committee of the legislature.

c) All submissions and reports of the committee must be made public.

d) Each review must include a mandatory review of any and all notwithstanding clauses and a review of s. 4A(2) of FOIPOP and s. 464A(2) of the MGA.

2022 Update:
No change.
Over time, the OIPC has received complaints about various organizations not subject to privacy laws in Nova Scotia. For example, because of the lack of coverage under Nova Scotia’s laws, the OIPC has been unable to take action in relation to complaints received from clients of regulatory bodies and not-for-profit organizations or from employees of businesses. There is no public policy reason why organizations who collect, use and disclose personal information should not be subject to privacy protection rules set out in the law and there is no public policy reason why Nova Scotians should be left without any protection or recourse in relation to their personal information collected, used and disclosed by organizations operating in Nova Scotia.

In 2019, Information and Privacy Commissioners across Canada unanimously called for all public and private sector entities, including political parties, that are engaged in collecting, holding using and disclosing personal information to be subject to privacy laws. Having applicable privacy laws in place is a critical component of a modern privacy protection regime and is needed to ensure that Nova Scotia has a coherent framework for privacy protection.

Nova Scotians’ privacy is not well protected where whole sectors that collect, use and disclose personal information are not subject to any privacy laws. In addition to the recommendations set out above, I encourage the Government of Nova Scotia to consider whether private sector privacy laws should be enacted in this province.

---

# THE YEAR IN NUMBERS

## Total Number of New Files

| 588 |

We received 246 reviews and complaints and 342 files initiated by public bodies, municipalities and health custodians.

## Education & Outreach

| 895 Inquiries |
| 28 Media Requests |
| 26 Speaking Engagements |
| 4 New Tools |

## Breaches Reported - Personal Health Information Act

| 866 |

Under section 70 of the Personal Health Information Act, health custodians are required to notify the Information and Privacy Commissioner of breaches of personal health information where the custodian has determined there is no potential for harm or embarrassment to the individual and has not notified the affected individual.

## Access and/or privacy consultations with public bodies, municipalities and health custodians

| 86 |

## 79% of review files resolved informally
Regarding the Backlog
An ongoing issue

The OIPC has a significant backlog of cases. Most of these are cases where a public body\(^7\) or health custodian withheld information and the applicant believes they are entitled to it. The applicants have asked that our office review the severing to ensure it is compliant with the law. We have cases waiting to be assigned that were received as far back as 2018. In other words, it takes at least four years for applicants to have their requests for review heard by our office.

Our capacity reached a critical point years ago. We have exceeded the limit of our ability to keep pace with the utilization of our office. This is evidenced by our substantial backlog. The underlying objective of FOIPOP, Part XX of the MGA, PRO and PHIA is to provide an avenue for administrative justice that is inexpensive, expeditious and accessible to the public. The OIPC’s lack of capacity to respond in a timely manner frustrates this objective. We have acknowledged and reported on our backlog for many years in our previous annual reports and we are doing it again this year as there is no end in sight.

Our resources have been stretched thin for many years. In 2013, our office underwent an independent review by the Nova Scotia Treasury Board to assess our efficiency. Aside from a few recommendations, all of which have since been implemented, our office was found to be running efficiently at that time.

Since 2013, utilization of our office has steadily increased.\(^8\) Figure #1 below demonstrates the overall increase in utilization since 2013, broken down by our mandate areas. An example of an area where we have received a significant increase in requests from public bodies and health custodians is time extension requests. In 2013, we received 56 such requests. In 2021-2022, we received 242. That is a 332% increase in eight years. Investigators who are tasked with receiving, assessing and approving or denying these requests are not able to work on review files in the backlog.

---

\(^7\) Public bodies include government departments, universities, regional centres for education, municipalities and municipal bodies, municipal police, transit authorities, health authorities, agencies, boards and commissions.

\(^8\) All historical information, in the form of year-by-year statistical reporting, can be found on our website going back to 2011: <https://oipc.novascotia.ca/node/369#overlay-context=node/369> or back to 1999 in our annual reports: <https://oipc.novascotia.ca/annual-reports>.
Regarding the Backlog
An ongoing issue

We have also seen increased utilization by the public for independent review of public body and health custodian decisions on access to information and privacy matters, which increased 122% since 2013. Overall, the use of OIPC services has increased 568% since 2013. The increased utilization of the OIPC shows no sign of abating.

Despite the 2013 Treasury Board findings, we continue to look for ways to improve our processes to try to reduce the backlog. In January 2020, we made several changes to our processes, including substantially modifying the process for conducting reviews where information has been severed. The number of access reviews we closed increased by 42%, however that was offset by a 13% increase in new access review files received.

In terms of staffing, Figure #2 demonstrates the number of OIPC staff in comparison with the number of reviews we received per year.

Since 2013, we have received approval for two additional positions: a senior investigator and an executive director. We asked for three more permanent investigators for the last two years. Unfortunately, our requests were denied. However, we were loaned three temporary positions for two years by the Nova Scotia Government. Those three term positions were filled in early 2022 so the impact of their contribution cannot be measured yet. Absent additional permanent staffing, we anticipate the result will be that the backlog will continue to grow, and applicants will be waiting longer than ever for their independent and accessible mechanism of administrative justice.

---

Overall, the use of OIPC services has increased 568% since 2013.

---

9 The OIPC does not have jurisdiction to investigate privacy complaints made against municipalities under Part XX of the MGA.

Service Plan for the Office of the Information and Privacy Commissioner
April 1, 2022 – March 31, 2023

Introduction
This Service Plan serves as our Statement of Mandate and our Accountability Report. The Service Plan reports on the outcome of our performance in the past two years and sets new performance measures for the coming year.

Vision
• Nova Scotia’s public sector is open and accountable.
• Privacy rights of citizens are respected and protected.

Statement of Mandate
The Office of the Information and Privacy Commissioner (OIPC) is the impartial oversight agency responsible for monitoring and overseeing compliance with four statutes: the Freedom of Information and Protection of Privacy Act (FOIPOP), the Privacy Review Officer Act (PRO), the Municipal Government Act, Part XX (MGA) and the Personal Health Information Act (PHIA).

Under these four statutes, the OIPC provides impartial oversight over more than 400 public bodies and more than 26,000 health custodians.

Who We Serve
Under FOIPOP, PRO, MGA and PHIA we serve:
• Citizens
• The Legislative Assembly of Nova Scotia

How We Do Our Work
Pursuant to the statutory duties assigned to the OIPC, we investigate access to information appeals and privacy complaints, conduct investigations into privacy breaches (including through self-initiated investigations), provide comments on the privacy and access implications of proposed legislation, programs, policies and technologies, conduct research, and educate the public about their access and privacy rights and public bodies about their legal obligations. Where necessary, the Commissioner conducts formal hearings and issues recommendation reports.

Outcome Highlights
The results of our performance measures were mixed. The two most noteworthy were:
• We saw a significant improvement in the acceptance rate of the Commissioner’s recommendations - from 37.5% in 2020/2021 to 74% in 2021/2022.
• We saw a significant decrease in our informal resolution rate - from 91% in 2020/2021 to 79% in 2021/2022.

---

10 Public bodies include government departments, universities, regional centres for education, municipalities and municipal bodies, municipal police, transit authorities, health authorities, agencies, boards and commissions.
The goal of having an open and accountable public sector goes to the heart of the purpose of access to information laws. One of the ways to measure the effectiveness of those laws is to monitor the timeliness of responses. After all, access delayed is access denied.

The first measure we use is a measure outside of our control. It is the timeliness of government’s responses to access to information requests as reported by the government in its annual report.11

2021/2022 Outcomes
The government does not report statistics on its performance until September following the close of the fiscal year. At the time of drafting this report, its statistics had not yet been released. Therefore, this report addresses government’s performance from 2020/2021. Information Access and Privacy (IAP) Services reported that in 2020/2021, government departments responded to access to information requests within 30 days 74% of the time. This is 1% higher than the previous year. The statistic is somewhat limited because while the law requires a response within 30 days, it also permits time extensions in some circumstances. What this means is that a perfect outcome will not necessarily be 100%, but certainly the departments should be aiming to be well above 90%. This year’s 74% response rate falls well below the 90% target rate we set for this performance measure.

There are two other measures we track in terms of how long government takes to process access to information requests: time extension requests12 and deemed refusals.13 In 2021/2022, based on our own statistics, the trend we observed is promising because in both cases the increase was less than in previous years. Time extension requests increased by only 1% in 2021/2022, while in 2020/2021, they increased by 21%. Deemed refusal reviews stayed the same in 2021/2022, while in 2020/2021 they increased by 33%. While this is a move in the right direction, we would like to see both numbers come down further and applicants getting their decisions within 30 days most of the time.

2022/2023 Strategies
We have two main strategies this year:

- **Right to Know Week**: Right to Know Week is an event that calls attention to the significance of access to information legislation. This year we engaged in a social media campaign and a public presentation
- **Duty to Assist**: A foundational responsibility of public bodies under our access to information laws is the duty to assist applicants who make access to information requests. We plan to continue our past work on this topic by developing and publishing guidance materials to help public bodies understand and comply with their duty to assist.

<td>Goal = 90%</td>
<td>Goal = 90%</td>
</tr>
</tbody>
</table>

---

12 Time extension requests occur when a public body or health custodian seeks approval from the OIPC to extend the time to respond to an access to information request to more than 60 days. There are several legislated criteria that the public body or health custodian must meet in order to be granted a time extension.

13 Deemed refusals are cases where the public body or health custodian has not responded at all within the legislated timelines (with or without a time extension) and so they are deemed to have refused to provide the information requested.
Goal 2: Respect for and Protection of Privacy by Public Bodies and Health Custodians

2021/2022 Outcomes
It is difficult to measure respect for and protection of privacy by public bodies and health custodians. One way is to examine the number of privacy complaints we receive on a yearly basis. In 2019/2020 we introduced a new measure to track this change and set a goal of reducing the number of new privacy complaints by 20%. In 2021/2022, we received 13 privacy complaints, which is the baseline. While this was not less than the baseline set in 2019/2020, it was a 13% reduction from 2020/2021. This is a disappointing outcome. On the one hand, it could reflect that the tools our office has been producing are having some effect. On the other hand, it highlights the continued impact that the pandemic has had on our training programs. We did not offer any privacy training sessions in 2021/2022.

A good way to improve respect for and protection of privacy among public bodies and health custodians is to provide training and information so that those tasked with ensuring compliance with privacy laws understand the rules. Last year, we were only able to reach 537 people with our education and outreach program.

We offer a variety of services to public bodies and health custodians to assist them with privacy issues. This year, the following services were sought by public bodies and health custodians looking for advice and guidance:

- 45 privacy consultations were completed.
- 9 voluntary breach reports were received and feedback was given.
- 1 privacy impact assessment was reviewed and feedback was given.

While the numbers above are a significant decrease from 2020/2021 across the board, we still view this as being a good indicator that public bodies and health custodians are showing respect for privacy.

2022/2023 Strategies
Because it is still not clear how the pandemic will continue to impact our ability to provide training, next year’s focus is to produce guidance materials for public bodies and health custodians. We had put training on pause because of both the pandemic and because we are not provided with enough human resources to fulfill this aspect of our mandate. This year, we will resume training, although most likely in a reduced capacity than in previous years. Specifically, we will:

- **Produce privacy-related materials:** We will monitor the questions we receive and the complaints that we hear about to identify materials to focus on.
- **Doctors Nova Scotia newsletter:** We will continue to contribute articles to the Doctors Nova Scotia newsletter.

---

<sup>14</sup> We received 15 privacy complaints in 2020/2021.

<sup>15</sup> We received 13 privacy complaints in 2021/2022.
Goal 3: Public Awareness of Access and Privacy Rights

2021/2022 Outcomes
Our third goal was to increase the public’s awareness of their access to information and privacy rights. We measure this goal by keeping track of the number of individuals who attend OIPC presentations and by tracking our presentations, tools and media articles.

In 2021/2022, we did not do in-person activities to promote awareness due to safety precautions during the pandemic, so we focused our efforts on the limited virtual sessions available. There were limited virtual sessions available because many organizations scaled back on their own presentations, which meant the OIPC received less requests to attend and present at them. The main message was the need for modernization of Nova Scotia’s legislation. We were only able to share our message with about 75% of the 700 individuals we were aiming to reach (those that we could count).

We also produced or supported new tools aimed at educating citizens about their access to information and privacy rights:

- Know Your Rights - Missing Records?
- Know Your Rights - Glossary: Privacy Terms (Personal Health Information Act)
- Questions about Nova Scotia’s Proof of Full Vaccination Policy
- Graphic Novel - Social Smarts: Nothing Personal!

2022/2023 Strategies
We are optimistic that the pandemic will not have the same impact as the last two years on our ability to put on in-person presentations for Nova Scotians. We will be looking for opportunities to get into the community and participate in in-person events. We will continue to explore and participate in virtual and hybrid opportunities as well.

In addition, we will continue to develop tools for the public to post on our website.

16 Presentations include speeches, meetings, training sessions and public education sessions.
17 Four of our virtual sessions were hosted by different organizations so we do not know the number of participants that attended. It is likely that this number was much higher but we cannot say for certain.
18 Presentations include speeches, meetings, training sessions and public education sessions, not necessarily in Nova Scotia.
2021/2022 Outcomes

Our final goal was to implement efficient and effective OIPC operations. Every year it becomes more difficult to achieve this goal because most years we get more files than the year before without a corresponding increase in our number of staff. 2021/2022 was the first time in many years that we saw a decrease in new files. At the same time, we closed more files than we received, which hasn’t happened in years. As a result, our backlog leveled off, which is progress.

Four factors contributed to progress that we made in 2021/2022:

- The overhaul and revamp project of our procedure for processing applicants’ requests for review.\(^{19}\)
- Changes to our consultation process.\(^{20}\) We received 23% fewer consultation requests, allowing us to focus on reviews and complaints.
- Changes to how we process deemed refusal reviews.\(^{21}\) We received 27% fewer deemed refusal review requests. This should reflect that applicants are getting decisions in a timely fashion without the need for the OIPC’s involvement.
- Three new staff for part of the year. In the last two months of 2021/2022, we onboarded three new temporary two-year term investigators. While they were still in training during this reporting period, their presence is a welcome relief for the staff who have been carrying the load for years. Our office grew by a third and we look forward to their positive impact in 2022/2023.

In 2021/2022, we responded to 99% of access to information and privacy inquiries within two days, despite working remotely for part of the year due to the pandemic.

Unfortunately, we were not as successful in resolving files without the need to go on to a public review report. This year our informal resolution rate was 79%.

On the other hand, where a review report was issued, we saw a significant increase in the uptake of the Commissioner’s recommendations. This year, the number of recommendations accepted by public bodies and health custodians doubled over 2020/2021. Of all the Commissioner’s recommendations, 74% were accepted. We are optimistic that this trend will continue, but we continue to believe that the fact that public bodies and health custodians are not required to comply with the Commissioner’s recommendations is a significant weakness in our access to information laws. We will persist in advocating for the laws to be modernized to fix this weakness.

\(^{19}\) See page 16 of our 2020-2021 Annual Report for more information about the changes made.

\(^{20}\) See page 16 of our 2020-2021 Annual Report for more information about the changes made.

\(^{21}\) See page 16 of our 2020-2021 Annual Report for more information about the changes made.
In terms of the acceptance rate of the Commissioner’s recommendations, this measure is largely out of our control. We have and will continue to encourage the government to strike an independent committee that seeks input from various stakeholders, including the OIPC, when it complies with its own mandate to amend the legislation. We will continue to examine our processes for opportunities for improvement.

Finally, 2022/2023 will be the new temporary investigators’ first full year. We are excited to see the impact this will have on our backlog.

### 2022/2023 Strategies

The main way we achieve efficient and effective operations is to provide our staff with the training and support they need to do their jobs well. We will continue our strategies of regular case file reviews, team meetings and staff training. This year we received positive news. We had previously never been allocated a training budget and so were forced to divert funding from other areas of our operating budget. This year, our request to have a training budget was approved.

---

22 This mandate was issued to the Minister of Justice by Premier Houston on September 14, 2021.

23 Inquiries are telephone calls, letters, emails and faxes that request basic access and privacy information such as how to file an access request, where to file a request, how to file a review and general privacy rights. In 2021/2022 we responded to 887 of 894 inquiries within two days.

24 Mediation, informal resolution, screened and withdrawn cases are included in this category. In 2021/2022, 132 of 167 FOIPOP, MGA and PHIA reviews were resolved informally.

25 Between April 1, 2021 and March 31, 2022, the Commissioner issued 21 access review reports that related to 21 files. In total, the Commissioner made 31 recommendations of which 23 were accepted and 8 were rejected.
## Annual Report Statistics

### All Files Opened and Closed Under

*Freedom of Information and Protection of Privacy Act, Privacy Review Officer Act, Municipal Government Act (Part XX), Personal Health Information Act*

*Please note that our office has received three two-year term investigator positions. They started in early 2022 and will end early in 2024. Because they are loaned by the Province of Nova Scotia, they do not affect our staffing count (nine permanent staff, including the Commissioner) or our budget.*
